CONCEIVE DESIGN IMPLEMENT OPERATE

CDIO Academy Track I: project poster exhibition

2014 CDIO Academy Teams:

- Environmental Awareness for high risk Professionals, Aston University
- Monitoring hydration levels and general health deterioration in the elderly, Aston University
- RoboShah. Fully self-contained, portable robotic chess, with its own artificial intelligence, ASU, Astrakhan
- Self-propelled defectoscope-crawler machine, ASU, Astrakhan
- Driving simulator for a susstainable future, Chalmers University of Technology
- Creating a virtual platform "Sekhi" by mapping transport systems to facilitate sharing community, Chalmers UT
- Development of an optical engine for Chalmers Vera Team, Chalmers University of Technology
- Silver Suit, Singapore Polytechnic
- Upper Extremity Rehabilitation Device, Singapore Polytechnic
- The project of improvement of the technological process at automobile plant, Kazan Federal University
- Augmented reality on Vâstankvarn farm with Geo Layer and Layar App, Novia UAS Finland
- Urinary Incontinence Test Bed, University of Liverpool
- Robotic prototype platform development for adolescent innovation, Chengdu UIT
- Design and implementation of simple automatic weather station, Chengdu UIT

CONCEIVE DESIGN IMPLEMENT OPERATE

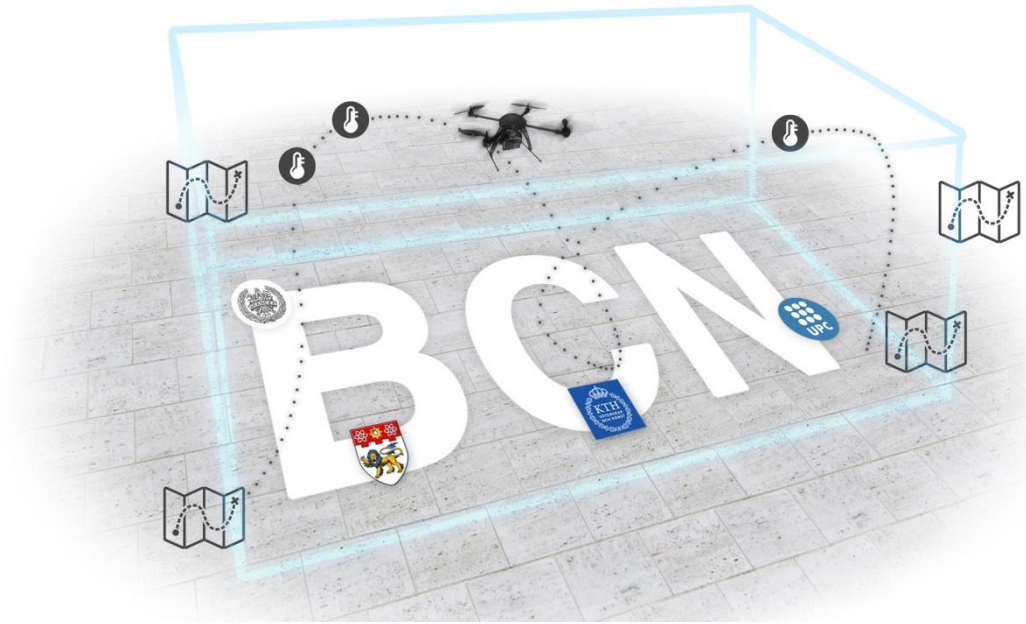
CDIO Academy Track II: Challenge Definition



–Global Picture Challenge: 12pt if the 4 blue corner markers are inside the picture.
–Local Picture Challenge: 11pt per obtained picture (11x3 = 33pt)
–Humidity Challenge: 10pt
–Temperature Challenge: 10pt
–CO Challenge: 10pt
–NO2 Challenge: 10pt
–No Battery Depletion: 5pt
–Best Mission Time: 5pt are awarded to the team with best mission time.
